NATIONAL AUDIT TOOL FOR AMUSEMENT DEVICES
Guidance for completing the National Audit tool.

- This audit tool is specifically for regulatory inspections by authorised officers of Work Health and Safety authorities. However it may be used in part or full by others, e.g. device operators preparing for an audit. Note: An audit using this tool is not a substitute for an annual inspection.

- The national audit tool provides 2 options,
  o a full audit, i.e. logbooks, maintenance records and site verification of set up and operation; complete sections A, B & C (in no specified order), or
  o a site set-up audit for the show set-up being completed; complete sections A & D only.

- WHS inspectors should check the National Register Spread Sheet (available from WHSQ Engineering Unit 07-3738 5096 or email designregistrationapplications@oir.qld.gov.au) and their jurisdiction’s register/database for outstanding notices/issues prior to auditing.

- If the WHS inspector is auditing a recently audited ride (e.g. within the last 2 months, this depends on jurisdictional requirements and guidance) and no issues were identified, the inspector may opt to only focus on site issues related to the set-up without the need to complete all elements of section D for site set-up.

- If there are elements of the audit tool that do not apply OR are not assessed mark those elements as N/A, i.e. not applicable or not assessed, and please include a short comment.

- Where complex issues are identified seek guidance from your amusement devices support unit (E.g. Engineering Unit in WHSQ). For example; enforcement of the design registration regulations or rider restraint assessment using the new Type 1, Type 2, etc, restraint assessment in AS 3533.

- To ensure subsequent audits cover any outstanding issues please use the summary sheet or leave your contact details with the operator so you can be contacted if an inspector needs clarification of any past audit issues.

- When complete, record the data as required in your jurisdiction and notify workplace health and safety Qld of details re notices issued. Contact details are at the end of each audit section and this data will be included on the National Register Spread-Sheet.

  Note: To accommodate the differences in legislation, some jurisdiction will utilise a slightly modified version of this audit tool.
Section A: Details of amusement device and PCBU

Item Registration Number: ________________ Expiry Date: ________ Issuing State or Territory: ____________________________

(As per the ride logbook, registration certificate or Engineer’s certificate)

Name of Device: ___________________________ Serial No: ______________ Class of Device: ________________

Name of Manufacturer: _____________________________________ Manufacture Date: ____________________

Design Registration Number: __________________________ Issuing State or Territory: __________________________

PCBU (legal entity): ____________________________

PCBU Phone Number: __________________ ________ Mobile: __________________________

ABN: ____________________________ ACN: ____________________________

PCBU Contact Email: ____________________________

PCBU Address: ____________________________

PCBU Audit Representative: __________________________ Phone Number: __________________________

Date of latest annual inspection: __________________________

Name of person who performed the annual inspection: __________________________

Name of inspector who conducted this audit: __________________________

Location of audit: __________________________ Date of completion of audit: __________________________
<table>
<thead>
<tr>
<th>Section B. Logbook &amp; Documents</th>
<th>Guidance Notes</th>
<th>Inspector’s Comments</th>
</tr>
</thead>
</table>
| **B1** | **Design Registration:** If required, does the device have design registration?  
If YES;  
- Record design registration number and  
the issuing State or Territory in section A  
If NO; take appropriate action  
If not required; record N/A in section A | **Y** | **N**  
(I) | Plant must be design registered as required by the WHS legislation where it has been set-up to operate (even if the device originates from a jurisdiction that does not require it).  
QLD – Refer to the guidance sheets issued on plant and design registration and issue any notice in line with the notices in the WHSQ notice library. The only current exceptions in QLD are listed in Schedule 5 and no device can be operated without the authorisations (registrations) required by section 42 of the WHS Act and the WHS Regulation.  
Devices requiring design registration are listed in;  
- Work Health and Safety Regulation S243, Schedule 5  
Part 1 (1.8) i.e. Class 2, 3, 4 & 5 to AS3533.1  
- Work Health and Safety Act S42  
- All jurisdictions recognise design registrations from other jurisdictions - Work Health and Safety Regulation S245  
NSW - Cl 70, schedule 18B, WHS Reg 2011 |
| **B2** | | |
| **B3** | **Plant Registration:** If required, does the device have current plant item registration?  
If YES;  
- Record the plant registration number and  
the issuing State or Territory in section A  
- Ask to view the registration document issued by a WHS regulator.  
If NO; take appropriate action  
If not required; record N/A in section A | **Y** | **N** | Plant item registration is not required in all jurisdictions (e.g. Victoria).  
Plant must be item registered before it is operated in jurisdictions that require plant item registration, (even if the device originates from a jurisdiction that does not require it).  
Devices requiring plant item registration are listed in;  
- Work Health and Safety Regulation S246 Schedule 5  
Part 2 (3.6) & 4(2) i.e. Class 2, 3, 4, & 5 to AS3533.1  
- Work Health and Safety Act S42  
- All jurisdictions recognise plant item registrations from other jurisdictions - Work Health and Safety Regulation S247  
Plant item registration is required every 12 months or five years depending on the jurisdictions |
| **B4** | | |
| **B5** | **Does the owner of the device have current public liability insurance and workers compensation policy?** | **Y** | **N** | Some WHS Regulators do not check for insurance policies |
### B6
**Notices outstanding:**
Ask the owner to confirm if the device has any notices issued that are outstanding?

**QLD – Note:** Information on any notices issued must be recorded in the logbook for the device.

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>
| Check log book, summary sheet and/or National register. Take appropriate action and note details of outstanding notices. | Relevant notice means –  
- an improvement or prohibition notice issued under WHS law,  
- an improvement notice, electrical safety protection notice or unsafe electrical equipment notice issued under the Electrical Safety Act  
- an infringement notice issued under the State Penalties Enforcement Act |

### B7
**Records:** Are records for the device available for inspection?

- Logbook
- Maintenance manual
- Operating manual

Are the logbook, operating and maintenance manuals provided to the persons involved with;
- Commissioning
- Installation
- Use
- Storage
- Testing and
- Dismantling of the amusement device?

**NOTE:** To be able to complete this item ALL points discussed above (and detailed in the guidance column) must be demonstrated.

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>
| Check for a form of recording system, e.g. in hard copy (logbook) or on computer, that includes up to date records. Logbook should include records of:  
- each person who has completed the training and instruction to operate the device  
- operation  
- tests  
- inspections  
- maintenance  
- setting up  
- commissioning  
- dismantling  
- alterations  
- Annual inspections  
- Major inspections  
- Notice issued for the device  

Manuals should include procedures for:  
- Commissioning  
- Installation  
- Use  
- Storage  
- Testing  
- Dismantling  
- Maintenance  
- Transport  

Confirm logbook and manuals are available during the site audit. | Work Health and Safety Regulation s237 & s242  
Qld WHS Reg s242A |

### B12
**Is there an up to date record of instruction and training for operators of the device?**

**QLD Note:** The operators who have completed the instruction and training required by regulation 238 must be recorded in the logbook for the device.

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>
| Training should be consistent with manufacturer’s recommendations.  
SA - Must include evidence of training provided to the trainer from the manufacturer/supplier of the device. | Queensland – the following information for any notice issued must be recorded in the logbook:  
- The date and any reasons why the notice was given:  
- Any action taken by the person for the notice:  
- If the relevant notice was given under a corresponding WHS law – the location of the device when the notice was given  

Relevant notice means –  
- an improvement or prohibition notice issued under WHS law,  
- an improvement notice, electrical safety protection notice or unsafe electrical equipment notice issued under the Electrical Safety Act  
- an infringement notice issued under the State Penalties Enforcement Act |

---

**WHS Regulators’ National Audit tool V5-1 Qld May 2019**
| B13 (C3) (C6) | Is there an up to date record of daily;  
• preoperational checks, and  
• operation of the device without passengers? | Y | N (I) | The checks should reflect the requirements of manuals.  
• Work Health and Safety Regulation \( S238 (1) \)  
Queensland  
• Updated Qld WHS Regulations \( S238(1A),(2)(d),(3) \) |
| B14 (C4) | Annual Inspections:  
Has the device been inspected by a competent person (e.g. professional engineer) within the last 12 months?  
If YES;  
• Record the date of the last annual inspection and  
• the name of the inspecting engineer in section A. | Y | N (I) | SA - Ensure that the owner of the amusement device has a copy of the Curriculum Vitae (CV) of the competent person that conducted the latest annual inspection. (Sight evidence of CV in the logbook) Has the competent person provided evidence of their appropriate qualifications to inspect all safety critical elements of the device?  
• Required every 12 months (the regulator may extend up to 35 days)  
• Work Health and Safety Regulation \( S241 \) |
| B15 (C4) (C6) | Does the annual inspection by the competent person (professional engineer) include;  
(a) a check of information about the operational history of the amusement device since the last detailed inspection;  
(b) a check of the log book for the amusement device; entries of the log book (repairs and alteration)  
(c) a check that maintenance and inspections have been undertaken under section S240;  
(d) a check that any required tests have been carried out, and that appropriate records have | Y | N | Check for a record (and engineer’s certificate if available) which outlines that the inspection was completed in line with the points in Work Health and Safety Regulation S241.  
QUEENSLAND – the following information on the annual inspection must be recorded in the logbook under Reg \( 242A(1)(g) \)  
• the name of the competent person who carried out the inspection; and  
• the date of the inspection; and  
• the results of the inspection and any recommendations of the competent person; and  
• any components repaired or replaced during, or as a result of, the inspection  
An Improvement Notice may be issued if the annual inspection does not address the identified points |
been maintained;
(e) a detailed inspection of the amusement device to ensure compliance with the Act and Regulation (including a specific inspection of the critical components of the amusement device)

QLD Note: Updated information from the annual inspection must be recorded in the logbook for the device.

<table>
<thead>
<tr>
<th>B15-1</th>
<th>Is the ride due for a major inspection as specified by the manufacturer or competent person?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Information on the major inspection must be recorded in the logbook for the device</td>
</tr>
<tr>
<td></td>
<td>• A major inspection certificate issued by a registered engineer should be available and should reference the major inspection report for the device</td>
</tr>
</tbody>
</table>

**THIS IS A REQUIREMENT OF THE UPDATED QLD WHS REGULATIONS ONLY Section 241A**

<table>
<thead>
<tr>
<th>B16</th>
<th>Is there a record of the device being maintained, inspected and if necessary tested in accordance with the designer or manufacturer’s recommendations or in</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(C4)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
<th>Detailed inspections by the engineer should include;</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>• rider restraint systems and associated interlock safety functions are operating correctly,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• loading plan</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• operational testing of the device (either loaded or unloaded condition)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• checking that NDT have been carried out (if applicable)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Checks for corrosion of structural members of the ride (if applicable)</td>
</tr>
</tbody>
</table>

Does the certificate (or record) provided by the Engineer include a statement that the device has been inspected and deemed safe to operate

**SA - Has the competent person for the purpose of annual inspection tested the patron restraint system and each individual patron restraint and confirmed function is satisfactory (i.e. that it is in good working order)?**

Is there verification evidence from a competent person that the ‘type’ of patron containment and restraint has been assessed as compliant for all foreseeable patron ejection forces?

- Work Health and Safety Regulation S241 & S266(2)(g)
- AS3533.3 Clause 11.4

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
<th>Seek confirmation, from the logbook or ride owner, of the manufacture date of the device. If the device is more than 10 years old you need to confirm what the major inspection period for the device is.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>The period will be:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• As specified by the manufacturer, Or</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• As recommended by the competent person who completed the last inspection, Or</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• 10 years if no information is available</td>
</tr>
</tbody>
</table>

The following information on the major inspection must be recorded in the Logbook:

- the name of the competent person who carried out the inspection; and |
- the date of the inspection; and |
- the results of the inspection and any recommendations of the competent person; and |
- any components repaired or replaced during, or as a result of, the inspection |

You may need to seek advice on the application of the transitional arrangements. A device manufactured before 1 May 2009 will have a 2 year transitional period to comply with the major inspection requirement.

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
<th>Confirm selected maintenance activities during site set-up/operational verification.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Records should include routine structural, mechanical and electrical inspections and tests.</td>
</tr>
</tbody>
</table>
### B17
**Reparis and Alteration:**
- Are any repairs or alterations, including those that affect the structural integrity of the device and/or rider restraints;
  - Recorded in the log book?
  - Reviewed by a competent person or manufacturer?
  - Alterations to the design of the ride may need a new application for design registration. Any change to the design that requires new measures to control risk will require a new application for design registration.

<table>
<thead>
<tr>
<th></th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>

- Notices may be Improvement or Prohibition and are subject to identification of and degree of risk identified during the site verification
- Alterations that may affect health or safety (i.e. require new measures to control risk) must be design registered as an alteration with a WHS Regulator.

- Work Health and Safety Regulation S237, S240 & S244

### B18
**Critical Components**
- Is there a Critical Components List for the device?
  - If there is no critical components list, is there:
    - a list of components identified by the manufacturer that require NDT; Or,
    - is it identified that the device does not have any critical components?
  - If the list includes NDT requirements go to Question B19, if NDT is NOT required go to Question B20

<table>
<thead>
<tr>
<th></th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>

- Critical components are those that if they failed may affect health and safety.
- A device may or may not have critical components. Either way this should be identified by the manufacturer or by a person with relevant competencies, such as the inspecting engineer.
- Critical components should be listed, and where there are no critical components identified, this should be stated in the logbook.

- Work Health and Safety Regulation S240
- Qld WHS Reg definition of critical component - **critical component**, of an amusement device, means a component of the device that would, if the component failed to function properly, be likely to cause a risk to the health or safety of a person.

### B19
**Is there evidence that the NDT requirements detailed in B18 above have been completed at the specified intervals?**

<table>
<thead>
<tr>
<th></th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>

- Sight certificate of test from accredited testing agency
- Testing should be carried out by a competent person accredited by a testing agency (e.g. NATA)?
- Test certificate should include:
Note: if any NDT record (NDT report) indicates that cracks (or similar) were found, is there evidence that repairs and follow up test(s) were completed? Check during the site set-up that repairs or component replacement has occurred.

<table>
<thead>
<tr>
<th>B20 (C7)</th>
<th>Control of Risks/Proper Use:</th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is there evidence that the risks associated with installation, commissioning and proper use of the device have been managed to be as low as reasonably practicable?</td>
<td>This looks at records only, verify during onsite checks. Any notices will result from onsite checks. Evidence includes checklists or instructions re likely risks and controls for the device, eg from: overhead power lines, overhanging trees, sloping ground, suitable dunnage/packing, machine safety guards left off, patron access &amp; egress (fencing, patron control etc), operator safety (interlocks on gates etc), transport, set-up, dismantling.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>B21 (C8)</th>
<th>Emergency Plans:</th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is there an Emergency Plan for the device?</td>
<td>The detail of the plan will depend on the size and type of device. S/see emergency plan. The plan should include emergency lighting and evacuation procedures.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Has the Emergency Plan been tested?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

<th>Section C. SITE VERIFICATION</th>
<th>Guidance Notes</th>
<th>Inspector’s Comments</th>
</tr>
</thead>
</table>
| C2 (B12) (B21) (C8) Training: Have workers been trained or instructed in the operation of the device? | **Y** **N** *(I)* | Ask workers if they have been trained or instructed in the operation of the device. Did it cover the following:  
- procedures for checking the device before it is operated with passengers  
- starting, operating and stopping the device under normal conditions  
- stopping the device in an emergency  
- providing for the safe access of passengers onto or into the device, including how to position, manage and secure passengers  
- giving safety instructions about the device to passengers  
- providing for the safe exit of passengers off or out of the device, including how to exit the device in an emergency or because of a power failure or malfunction.  
- Work Health and Safety Regulation S238(1)  
- Updated Qld WHS Regulations S238(1A), (2)(d), (3) |
| C3 (B13) Operation: Confirm the workers are aware of the procedure for the daily operation without passengers and the requirement to record it. | **Y** **N** *(I)* | If the device is operating review the logbook or daily sheet. An Improvement Notice may be issued if these checks are not completed  
- Work Health and Safety Regulation S238 (2) |
| C4 (B15) (B16) Engineers Inspection and Maintenance Records. Select at least 2 items from the engineer’s report/ maintenance records and confirm that they have been completed on the device. | **Y** **N** *(I) (P)* | Any Notices issued will depend upon risk identified  
- Work Health and Safety Regulation S241 (2)  
- Work Health and Safety Regulation S240 |
### Repairs or Alterations:

- **Is there evidence of recent Repairs or Alterations?**
- **If found, were these recorded in the logbook?**
  - Alterations to the design of the ride may need a new application for design registration. Any change to the design that requires new measures to control risk will require a new application for design registration.

#### Enforcement
- Look for evidence such as:
  - re-welded areas
  - new bolts or pins
  - alterations to rider restraints etc
- Enforcement will depend on record keeping and/or evidence of the checks done by a competent person.

- **Work Health and Safety Regulation** S240

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>

### Patron restraints and loading plan:

- **Where patron restraints are provided, do they operate correctly?**
- **Is there certification available that the rider restraint system has been assessed as suitable for the type of device?**

#### NOTE:
- In some cases where the device is not ‘powered up’ you may not be able to have the restraint system demonstrated, if so mark this as N/A and note on summary sheet.

#### Check for:
- latches and springs function correctly
- Check that seating requirements; loading plans and rider height limitations are readily available and being correctly implemented.
- Any Notices issued will need to be considered on a case by case basis and discussed with your technical advisor.

- **Work Health and Safety Regulation** S240
- **Work Health and Safety Regulation** S206

<table>
<thead>
<tr>
<th>Y</th>
<th>N</th>
</tr>
</thead>
</table>

### Proper Use/Defects:

- **Conduct a visual check of the device for risk controls and any obvious defects, list defects found and enforce accordingly.**

#### E.g.
- Are there any potential ride envelope intrusions?
- Is patron access controlled by fencing or other barriers?
- Are the operator’s controls inaccessible to the public?
- Is there sufficient space to set-up and operate the device?

#### Check for:
- missing bolts
- missing ‘R’-clips or pins
- broken or damaged members
- misaligned rails or tracks
- inadequate packing
- inadequate tie-downs
- patron access and egress
- fencing to prevent patron access
- damaged components
- floor plates for trip hazards
- check controls are marked and not confusing
- can patrons access controls
- patron restrictions are in place
- consistency of fastenings, bolts, etc;
- interlocks in place and functional
- machine safety guards not left off
- sloping or soft ground
- excessive corrosion
- dunnage/packing,
- sufficient space to set up and use etc.

#### Any Notices issued will depend upon risk identified

- **Work Health and Safety Regulation** S240

Queensland legislation  
• Electrical Safety Act S30, S38  
• Electrical Safety Regulations S118 |
|---|---|---|---|
| C13 | Is all electrical equipment inspected, tested and records kept as required by the applicable electrical regulation? | Y N (I) | Check that a tag is attached to the electrical equipment giving the details of the last test and the next test due date.  
• WHS Regulation S150  
Queensland legislation  
• Electrical Safety Act S30, S38  
• Electrical Safety Regulations S116 & S117 |
| C14 | Are all extension cords and flexible cables protected against damage? | Y N (I) | Visually check the set-up. Ensure cables are:  
• located where they are not likely to suffer damage or  
• protected against damage.  
• WHS Regulation S147 & S149  
Queensland legislation  
• Electrical Safety Act S30, S38  
• Electrical Safety Regulations S102 |
| C15 (ESPN) | Overhead powerlines  
Is there adequate clearance for overhead powerlines in the vicinity of the device/ride? | Y N (I) | Visually check the set-up area.  
In some jurisdictions the minimum distance is 3 metres for line voltages up to 132 kV. Check local requirements for electrical exclusion distances.  
• WHS Regulation S166  
Queensland legislation  
• Electrical Safety Act S30, S38  
• Electrical Safety Regulations 2013 S68 & S69  
• Qld COP 2010 Working near overhead and underground electric lines |
| C16 (I) | Underground powerlines  
Have all securing pegs been installed so as not to present a risk from underground power lines? | Y N (I) | Visually check set-up area, look for markers or line-of-site between switchboards; is there information available from the PWMC of the showground.  
• WHS Regulation S166  
Queensland legislation  
• Electrical Safety Act S30, S38  
• Electrical Safety Regulations 2013, S68  
• Qld COP 2010 Working near overhead and underground electric lines |
| C17 (B26) | Live Parts: Visually check for obvious exposed live electrical parts. If identified, has access to exposed live parts been controlled? | Y | N (I) | Switchboard cabinets should be secured to prevent unauthorised access. Can the operator access live parts in the cabinet accidentally (are the terminals insulated or shrouded)? Check festoon/decorative lighting have bulbs in all accessible sockets and bulbs with broken glass should be replaced. For detailed advice contact your electrical advisor. |
| C18 | High current, single pole, plug and sockets: If single pole connectors and leads are used request evidence that the connection between the generating source and the ride has been checked and deemed “electrically safe” by a competent person for electrical equipment? Refer to the jurisdictions requirements for the competent person and whether an electrician is required. | Y | N (I) | When a device has removable single pole connections for the three phase power supply (i.e. individual leads and plugs for each phase) the risk of incorrect connection and disconnection of leads can result in unsafe plant. Therefore connection and disconnection of the device from the power supply should only be undertaken by an electrically competent person. These connectors may be used in cables that connect large three phase rides to electrical generator sets. Some of these connectors may require additional controls if they are to be used to ensure the electrical installation is electrically safe. Contact your electrical advisor for guidance on these plugs and sockets. |

**Information for the national register:**
Please remember to Fax or e-mail copies of notices and incident details to WHSQ Engineering Unit for inclusion in the Nation Register:

- **Contact Details:** WHSQ Engineering Unit
- **E-mail:** designregistrationapplications@oir.qld.gov.au

**For WHSQ:** CISR Descriptor Codes: AMU1 - Large Shows and Festivals, AMU2 - Small Shows, Fetes and Carnivals
WHS REGULATORS’ NATIONAL AUDIT TOOL FOR AMUSEMENT DEVICES
Ride owners should keep this sheet or the entry/inspection report available as evidence of having an audit completed.

FULL AUDIT SUMMARY SHEET 1 of 2

Item Registration Number: ____________________________ Name of Device:__________________________

Name of auditing inspector: ____________________________ Inspector/Entry report No:__________ State__________

Location of audit: ____________________________ Date of audit: ____________________________

<table>

1. Complete this page or an entry/inspection report and leave with PCBU (preferably in the logbook).
2. Briefly note in the “Inspection” section of the logbook that a national audit was completed and the summary sheet or entry/inspection report was provided to the PCBU. If notices were issued include the word “notice issued” in the logbook entry.
3. Some jurisdictions will issue an Entry Report or Inspection Report as the summary sheet.
4. The summary sheet or entry/inspection report is evidence that a Full Logbook Audit was completed in line with the Regulators’ National Audit Tool and any non-compliance(s) requiring action by the PCBU are listed above.
