Quad bike riding is fun and it’s easy to stay safe

Can you spot the five safety differences?

For more quad bike safety tips visit qld.gov.au/rideready

Ride Ready

Wear a helmet – what else will protect you if you fall off?

Only ride a kid-sized quad bike – an adult bike can weigh a huge 300 kilograms and is harder to control.

Don’t carry passengers or a big load on your quad bike – it’s harder to control the bike and you could crash.

Get some training to make you a safer rider – ask your parents to sign you up.
