Healthy workers survey

Identifying and assessing workplace work health and wellbeing risks involves looking for factors in the workplace that have the potential to cause poor physical health and/or psychological health.

This survey provides a profile of your workforce’s health and wellbeing status. These results should be used in conjunction with the healthy workplaces audit tool to identify and assess work health and wellbeing risks and develop targeted interventions.

The survey will take approximately 10 minutes to complete.

Confidentiality

- The answers you provide on this survey will be collated with all other responses from the survey to provide a summary.
- To ensure anonymity and confidentiality, please avoid recording your name, or any other information that may identify you on this survey.
- Your data will be collated into an overall organisational report. There is an option to receive an individual report.
