A licence is required for the following demolition work:

1. Demolishing or dismantling a structure that contains pre-tensioned or post-tensioned structural components.
2. Demolishing or dismantling a structure that involves use of load shifting equipment e.g. use of combination front-end loader and backhoe, skid steer loader, excavator, crane.
3. Demolishing or dismantling a structure that involves the use of explosives or another induced collapse method.
4. All other demolition work also requires a licence unless the structure being demolished or dismantled is any of the following:
 - A domestic house
 - A structure built as, and still having generally the characteristics of, a domestic house e.g. a domestic house converted to flats or an office
 - A structure that is ancillary to a domestic house or a structure with the characteristics of a domestic house, e.g. a carport or garage for a domestic house and the structure does not contain the structural components described in (1) above and the work does not involve the use of loadshifting equipment, or the demolition methods described in (2) or (3) above.

Demolition work does not include:

- the dismantling of formwork, falsework, or other structures designed or used to provide support, access or containment during construction work e.g. scaffolding, barricades, gantries, hoardings, perimeter containment screening or tower cranes; or
- the removal of power, light or telecommunication poles.
