

# Work Well Speaker Series 2023

## Developing evidence-based and practical solutions for preventing harm

Dr Gregory Zelic

### Abstract

Diving into the focuses of the Centre for Work Health and Safety, Dr Zelic spoke to our view for addressing the future of work, including:

- staying ahead of the game through rigorous evidence collection of current and emerging trends
- reassessing and preparing for the future of regulation by understanding how we can keep up with rapidly changing worlds of work
- embracing opportunities into the future, including new ways of working and technologies that will allow us to progress in ways that we have never been able to.

### Key takeaways

The Centre for WHS can support you keeping ahead of the Future World of Work.

- The Centre regularly publishes evidences in regard to new and emerging ways of working and their WHS implications:
  - [Understanding the Changing World of Work scan](#)
  - [The WHS Radar](#) delivers regular and actionable insights about new and emerging WHS harms
  - [The WHS Insights Newsletter](#) provides leading, local and trending WHS research
- The Centre regularly publishes tools which you can use to prevent new and emerging harms. For example:
  - [Guidelines for Safe collaborative robot design and implementation](#)
  - [Artificial Intelligence \(AI\) WHS scorecard](#) for risk assessment and management
  - [Guidelines for the integration of WHS management in Building Information Modelling \(BIM\)](#)
- Stay up-to-date with the Centre's ongoing program on the Future World of Work and its implications for WHS professionals and regulators:
  - [Engage with us!](#)
  - Follow us on all social media platforms
