Queensland

1. Summary of findings

a. Labour market

- Employment grew 1.6 per cent per annum in Queensland on average over the five years to 2019–20.
- In 2019–20, there were an additional 149,341 workers employed in Queensland compared with 2015–16, representing six per cent growth over the five-year period.
- Workers in Queensland are employed on a predominantly full-time basis. In 2019–20, the proportion of full-time employment was 69 per cent.
- The rates of full and part-time work in Queensland have remained relatively stable since 2001 and up until COVID-19.

b. Accepted workers' compensation claims

i. Occupations

- In 2018–19, most workers in the Queensland sector were employed as:
 - professionals (547,674 or 22 per cent)
 - technicians and trades workers

(361,618 people or 14 per cent).

• The occupation with the highest claim rate in 2018–19 was labourers (62.8 claims per 1,000 employed people).

ii. Non-fatal claims and claim rates

- In 2019–20, the non-fatal claim rate for Queensland was 27.4 claims per 1,000 workers, which was lower than the previous four years.
- In 2019–20, Manufacturing recorded the second highest number of non-fatal claims (10,279 claims) after Health care and social assistance (10,776), and the highest claim rate at 62.4 claims per 1,000 employees.

• Between 2015–16 and 2019–20, Queensland's non-fatal claim rate fell nearly three per cent on average per annum.

iii. Serious injuries

- The serious injury claim rate for Queensland in 2019–20, at 12.3 claims per 1,000 employees, was lower than the previous year's rate of 12.6 in 2018–19.
- From 2015–16 to 2019–20, the serious injury claim rate in Queensland grew marginally at 1.2 per cent per annum.

iv. Mechanisms of injury

- The most common mechanisms of injury over the five years to 2019–20 were:
 - body stressing (34 per cent)
 - falls, trips and slips (20 per cent)
 - being hit by moving objects (19 per cent).

v. Agencies of injury

- The most common agencies of injury over the five years to 2019–20 were:
 - non-powered hand tools, appliances,

and equipment (28 per cent)

- environmental agencies (16 per cent)
- material and substances (16 per cent)
- animal, human, and biological agencies
 (13 per cent)
- mobile plant and transport (12 per cent).

vi. Fatalities

• Over the period 2015–16 to 2019–20, Queensland recorded 59 fatalities claims a year on average.

c. Inspectorate activity

- In 2019–20:
 - There were 23,114 proactive activities such as workplace visits, workshops, presentations and seminars by

inspectors to businesses in Queensland, which accounted for approximately 27 per cent of all inspector activities in 2019–20.

- Approximately two-thirds (64 per cent) of events notified for the Queensland industry were categorised as bodily harm or dangerous event.
- Reactive activities make up the highest proportion of activities for inspectors – 73 per cent.
- There were 19,345 statutory notices issued to businesses in Queensland in 2019–20. This is significantly higher than the four years prior, at an average of 7,486 notices per annum.
- Over 80 per cent of notices issued to businesses in Queensland were improvement notices.

d. Notified fatalities

 Over the period 2015–16 to 2019–20, Office of Industrial relations was notified on average of 33 fatalities a year which were deemed work-related.

2. Labour market

a. Business size

Table 1 below shows the vast majority of businesses in Queensland in 2019 were small businesses (97 per cent). A small proportion of businesses were medium sized (three per cent) and large sized (less than one per cent).

b. Workers employed

The number of employed people, as determined by the Australian Bureau of Statistics (ABS) through its labour force survey, has been used in this report as an estimation of the number of workers covered by workers' compensation in Queensland and to calculate claim rates.

In 2019–20, more than 2.5 million people were employed in Queensland. From 2015–16 to 2019–20, there was an annual average growth in employment of 1.6 per cent, equating to 149,341 people. The Health care and social assistance industry was by far the biggest employing industry in Queensland, with Construction in second place.

Table 2 shows in 2019–20, the number of employed was highest in:

- Health care and social assistance (355,623 people or 14.1 per cent of Queensland)
- Construction (245,609 people or 9.8 per cent)
- Retail (232,614 people or 9.2 per cent)
- Education and training (217,490 people or 8.6 per cent).

c. Full-time and part-time employment

In 2019–20, workers were engaged predominantly on a full-time basis (69 per cent) in Queensland. Fulltime employment was most prevalent in Mining (94 per cent), and Electricity, gas, water and waste services (90 per cent). Both these industries were male dominated in 2020, with 83 and 74 per cent of workers being male, respectively₁.

Over the period 2015–16 to 2019–20, employment in Queensland shifted marginally toward part-time jobs, increasing by an average 2.2 per cent annually over the period. As a result, the proportion of full-time employment in Queensland fell marginally by 0.7 of a per cent from 69.6 per cent of the total employed in 2015–16, to 68.9 per cent in 2019–20. The rates of full and part-time work in Queensland have remained relatively stable since 2001 and up until COVID-19, with only marginal fluctuations over the period.

3. Accepted workers' compensation claims

a. Accepted claims by occupation

In 2018–19, employment in Queensland was highest for the occupation groups:

- Professionals (547,674 people or 22 per cent of all employed workers)
- Technicians and trades (361,618 people or 14 per cent of all employed workers)
- Clerical and administrative workers (358,042 people or 14 per cent)
- Community and personal services workers (285,396 people or 11 per cent).

Table 4 below shows Labourers had the highest number of accepted claims in 2018–19 (16,595 claims and a claim rate of 62.8) followed by Technicians and trades workers (13,675 claims and a claim rate of 26.3).

Note that 2019–20 claims data has been omitted due to a lag in coding occupation data.

b. Accepted non-fatal claims and claim rates by industry

The claim rate for Queensland accepted non-fatal (injury plus disease) claims has fallen by 2.6 per cent per annum, down from 30.6 in 2015–16 to 27.4 claims per 1,000 workers in 2019–20 (Table 5). This can be attributed to the growth in numbers employed, along with the reduction in the number of claims.

Table 5: Queensland industry, total accepted non-fatal claims and claim rate

Sources: QSA, July 2020. ABS, Labour force, Australia.

In 2019–20 there were 68,993 accepted non-fatal injury and disease claims. Of those, 48,571 related to injuries while 20,422 related to diseases and other causes.

Over the five years to 2019–20, Queensland experienced an average annual reduction of 1.9 per cent per annum in the number of non-fatal injury claims. The number of non-fatal disease and other claims fell 0.9 of a per cent per annum over the same period (Table 5).

The incidence (claims per 1,000 workers) of non-fatal injuries and non-fatal diseases in 2019–20 was 19.3 and 8.1 respectively, with Manufacturing workers most likely to make a claim (45.2 and 17.2 respectively).

c. Serious injury claims by industry and occupation

In 2019–20, the serious injury claim rate (injuries requiring one or more weeks off work) was 12.3 claims per 1,000 workers for Queensland.

Over the five-year period to 2019–20, the serious injury claim rate increased by 1.2 per cent per annum for all Queensland industries. This was significantly different to the 2.6 per cent per annum reduction for the all claims rate over the same period.

The Health care and social assistance industry recorded the highest number of serious injury claims in 2019–20 with 5,983 claims or 19.3 per cent of all serious claims made by Queensland workers. The Manufacturing industry had the highest claim rate in 2019–20, at 22.8 per 1,000 workers (3,749 claims).

Labourers had a large number of serious claims and a high claim rate (7,566 claims and 28.6 claims per 1,000 employed people respectively) in 2018–19. Approximately a quarter of serious claims are from Labourers. There were also a substantial number of claims for Technicians and trades workers each year, with 5,518 serious claims in 2018–19, or approximately a fifth of all serious claims.

Overall, claims for serious injuries in Queensland accounted for 40 per cent of the total number of accepted non-fatal claims.

Note that 2019–20 claims data has been omitted due to a lag in coding occupation data.

d. Mechanism of injury (non-fatal claims)

Table 10 below shows the most common mechanisms of injury in Queensland, across all industries for the period 2015-16 to 2019–20, were:

- body stressing (34 per cent)
- falls, trips and slips (20 per cent)
- being hit by moving objects (19 per cent).

These three mechanisms accounted for the majority (73 per cent) of industry claims.

In addition to these three mechanisms, hitting objects with a part of the body was common in Accommodation and food services (21 per cent), Manufacturing (19 per cent), and Other services (17 per cent).

Table 10: Queensland industry, most prevalent mechanisms of injury for accepted non-fatal workers' compensation claims, 2015–16 to 2019–20

| Industry | Mechanism of injury | Percentage of claims within subdivision (%) |
|--|---|---|

e. Agency of injury (non-fatal claims)

Table 11 shows that the most common agencies of injury in the Queensland industry over the five years to 2019–20 were:

- non-powered hand tools, appliances and equipment (28 per cent)
- environmental agencies (16 per cent)
- material and substances (16 per cent)
- animal, human and biological agencies (13 per cent)
- mobile plant and transport (12 per cent).

In Manufacturing, machinery and (mainly) fixed plant (12 per cent) was also a common agency of injury.

Table 11: Queensland industry, most prevalent agencies of injury for accepted non-fatal workers' compensation claims, 2015–16 to 2019–20

| Industry | Agency of injury | Percentage of claims within subdivision (%) |
|---|--|---|
| | Non-powered hand tools, appliances and equipment | 24 |
| Agriculture, forestry and fishing (10,887 claims) | Environmental agencies | 23 |

f. Serious injury costs

Table 12 details average cost of injuries. Although psychological and psychiatric injury claims account for only 3.1 per cent of all serious injuries, they are the most expensive with an average cost of \$48,840 in 2019–20 and all the years prior. The second most expensive injury type was fractures with an average cost of \$36,680, while the average cost of a serious work-related injury was \$21,830 in 2019–20.

| Table 12: | Average serio | us injury | cost by | injury | y nature |

g. Accepted workers' compensation fatal claims

Table 13 details a breakdown of workers compensation claims for work related fatalities that have occurred at the workplace. This table shows the 'accepted number of fatal workers' compensation claims in Queensland by major industry groups, as administered under the *Workers' Compensation and Rehabilitation Act 2003*.

The Construction industry recorded the highest number of fatalities of all Queensland industries over the period 2015–16 to 2019–20. On average, there were 10 fatality claims for Construction each year and 59 for Queensland overall.

| Industry | 2015-16 | 2016–17 | 2017–18 | 2018–19 | 2019–20 | Average |
|---|---------|---------|---------|---------|---------|---------|

4. Inspectorate activity

a. Events notified

There were 7,161 notified events in Queensland in 2019–20. Events in the bodily harm/dangerous event category account for two-thirds of all notified incidents in Queensland.

| Incident type | Number of events notified | | | | | | | |
|-------------------------------|---|---------|---------|---------|---------|--|--|--|
| | 2015-16 2016–17 2017–18 2018–19 2019–20 | | | | | | | |

Source: CISR, extracted July 2020 Notes: # admitted to hospital. ## all other incidents including dangerous events.

The number of notified fatality events presented in Table 14 are the number of work-related fatalities recorded and coded as such, under the *Work Health and Safety Act 2011* (WHS Act). It is the record of notifications to the workplace health and safety regulator of workers (both employees and self-employed) who suffered a fatal injury at work as well as bystanders who suffered a fatal injury as a consequence of work activity.

b. Inspectorate activity

Table 15 shows that most inspector activities are reactive, with Other intervention activities: reactive accounting for the most, averaging 58 per cent over the five-year period to 2019–20. Proactive activities made up nearly a third (27 per cent) of activities in 2019–20.

It is important to note that activities in different categories and within categories are not necessarily equal in terms of time or resources used.

Table 15: All industries, inspectorate activities

| Type of activity | Number of inspector activities | | | | |
|---|--------------------------------|---------|---------|---------|---------|
| | 2015-16 | 2016–17 | 2017–18 | 2018–19 | 2019–20 |
| Number of workplace visits: reactive | 7,378 | 8,469 | 9,830 | 10,674 | 11,569 |

c. Statutory notices

Over recent years, WHSQ inspectors have issued more statutory notices in response to the findings of the Best Practice Review (BPR). The BPR recommended a shift to directed compliance, noting that stricter compliance by duty holders would reduce the exposure to risk of injury and illness to workers and others thereby reducing injury rates and workplace illnesses.

Table 16 details the different types of compliance notices issued by inspectors under the WHS Act *or the Electrical Safety Act 2002* (ES Act).

In 2019–20, improvement notices were the most issued type of notice to businesses in Queensland (81 per cent).

| All industries | 2015-16 | 2016–17 | 2017–18 | 2018–19 | 2019–20 | |

d. Notified fatalities

Table 17 details fatalities notified to the Office of Industrial Relations (Workplace Health and Safety Queensland, and the Electrical Safety Office). The fatalities reported below are ones that fall under OIR's jurisdiction, and have, after investigation, been determined to be 'work related' and are there for reported to Safe Work Australia. These fatalities also include fatalities of bystanders that die as a result of work activity being undertaken.

The Agriculture, forestry and fishing industry recorded the highest number of notified work-related fatalities of all Queensland industries over the period 2015–16 to 2019–20. On average, there were 11 fatality claims for Agriculture, forestry and fishing each year and 33 for Queensland overall.

| Industry | 2015-16 | 2016–17 | 2017–18 | 2018–19 | 2019–20 | Average |

Note: Fatality notifications for deaths caused by natural causes, suicides, (public) road traffic incidents and other non-jurisdictional fatal events have been excluded from this report.

5. Explanatory notes

Accepted claims

Accepted claims are those where an insurer has accepted liability for the claim at some stage of the claims history. Accepted claims may be subject to development over time, thus the category they are reported in may change over time. Claims for a serious injury are those involving one or more weeks off work.

Accepted claims include the categories:

- accepted non-fatal injury claims (including the category 'accepted non-fatal serious injury claims')
- accepted non-fatal disease and other claims
- accepted fatal workers' compensation claims.

Claim rate

Due to data availability, a different source of data is used when calculating claim rates for occupations.

 The claim rates for the type of claim by occupation reported in Table 4 and Table 9 are based on employment by occupation data published by the Australian Bureau of Statistics (ABS) in the quarterly publication, *Labour Force, Australia Cat. No. 6291.0.55.003.* The claim rate is derived using the following formula:

Number of claims (by occupation) x 1,000

= Claim rate per 1,000 workers covered by worker's compensation

Number of employed (by occupation)

2. The claim rates for the type of claim by industry reported in Tables 5, 6, 7 and 8 are based on the number of employed people from ABS labour force data. This is used as an approximation of employees covered by workers' compensation and is likely an overestimate of less than ten per cent. In between Census periods, ABS labour force data is the best information available for this purpose. The claim rate is derived using the following formula:

Number of claims (by industry) x 1,000

= Claim rate per 1,000 workers covered by workers' compensation

Number of employed (by industry)

Events

- The WHS Act prescribes that a person who conducts a business or undertaking must ensure that the regulator is notified immediately after becoming aware that a notifiable incident arising out of the conduct of the business or undertaking has occurred. What is considered to be notifiable is also defined in this legislation.
- The Office of Industrial Relations (OIR) also receives requests for regulator response.
- Notifications and reports to OIR are assessed as per the WHSQ Response Assessment Process based on a number of factors including, but not limited to, the severity of the incident. This forms the basis for the action taken by OIR in response to the notification or report and can include administrative response, regional response, Electrical Safety Office (ESO) response or response by one of the specialist units in OIR.
- As part of this process, incidents are categorised as types as per the categories prescribed in the legislation based on the information Assessment Services is provided and/or gathers as part of their assessment process.

Full-time workers

Full-time workers are people who usually work 35 hours or more per week in all jobs, or although usually working less than 35 hours a week, actually worked 35 hours or more during the reference week.

Part-time workers

Part-time workers are those who usually work less than 35 hours per week, and either did so during the reference week, or were not at work in the reference week.

Notices

- Statutory notices represent notices issued as a result of both proactive and reactive work.
- Data in this report may differ from other data published on statutory notices due to the date of extraction from the database.
- Due to various legislative changes occurring over the period 2015–16 to 2019–20, caution should be exercised when comparing changes in data items over this period. The various data items, relevant legislation changes and some of the impacts are explained below:
 - 'Infringement notices' are on-the-spot fines for contravention of either WHS legislation or the ES Act.
 From 1 January 2012, this data includes infringement notices where a dangerous and/or hazardous substance is involved.
 - 'Seizures' includes a number of notice types, all relating to when something (e.g. plant, tool or workplace) is seized for evidence, or where a workplace which is the subject of investigation is not to be disturbed. Seizure notices are issued under either the WHS Act, ES Act or, until 1 January 2012, the *Dangerous Goods Safety Management Act 2001*.
 - 'Electrical safety protection notices' and 'unsafe equipment notices' are issued by WHSQ inspectors under the ES Act. The 'electrical safety protection notice' is the equivalent of the 'WHSQ prohibition notice' and the 'unsafe equipment notice' is also the equivalent of the 'prohibition notice' but where it relates specifically to equipment, as opposed to work processes.
 - 'Improvement notices' require an improvement in health and safety by a specified time and can be served under either the WHS Act or ES Act.
 - Prohibition notices' prohibit a certain work activity or use of certain equipment and can be served under WHS legislation only.

Site visits

Site visits represent the number of times a workplace was visited by WHSQ staff. One or more site visits may take place as part of any given investigation, assessment or advisory. Advisories are an educational or industry information activity undertaken by an inspector.

Workers covered

Covered workers have been approximated using the ABS number of employed people. See Claim rate section above for further information.
